11/1-11/2			Do we have any engineers out there? We wanted to share this video that we did for Washington Universities Engineering Department. This was one of our favorite projects because it takes such a positive outlook towards the future. Engineering will be one of the fields that help us achieve a more sustainable future! Because of this, we feel that these students are future leaders! Leadership is one of Vudzu's core principles, so that makes this project very powerful for us! How do you plan to help the future be more sustainable? #createdbyvidzu #engineering	Do we have any engineers out there? Check out these photos of some B-roll shots we took for a project that we did for BJC Healthcare! Adding B-roll to a finished project can make the completed video so much better!
